

SOLUTION BRIEF

Workforce Upskilling

Reimagining Skill Development for Entire Jurisdictions

Background

A global skills crisis is here. Technology is shrinking the shelf life of workplace skills, and almost all organizational leaders identify the risk as a high priority. However, close to two-thirds say their company is ill-equipped or unable to develop the skills of the present and the future.

While employers focus on the here and now of operational survival, the daunting task of assessing broadly-applicable skill gaps and deploying relevant upskilling solutions must be raised to the industry-level. Governments and industry groups now recognize that effective workforce upskilling is under their purview.

It's a critical process that addresses risks associated with worker safety, employability, and productivity of their workforces. And, it ensures that all employers and workers are afforded accessible and consistent skill development, which benefits all industry participants.

Advanced training platforms that go beyond the capabilities of the single-employer LMS are key to enabling full workforce skill development.

And this is where we come in. With our SkillsPass platform, we offer a transformational workforce upskilling solution that powers on-demand skill development for all workers facing rapid change.

With the SkillsPass platform, all member companies can easily register workers for relevant and required skills training online, and can facilitate recertification with ease.”

Solution Overview

Bluedrop's SkillsPass platform replaces outdated and piecemeal approaches to complex and time-sensitive upskilling challenges facing industries, employers, and workers.

OUR INDUSTRY INTEGRATED PLATFORM

Our platform reimagines the way interdependent industry groups connect and seamlessly deliver workforce upskilling across entire industries.

OFFERING ON-DEMAND TRAINING

The SkillsPass MarketPlus Training Hub empowers employers and training providers to easily manage any training format. Whether it's approved training partners, licensed 3rd party courseware, or Bluedrop's library of eLearning, it's always easy to access and consume.

WITH STREAMLINED & SECURE DELIVERY

Workforce upskilling is complex- we get it. Our solution is uniquely positioned to help advance training access, eliminate inefficient manual processes, and optimize credential storage and sharing.

Core Solution Capabilities:

- ✓ Approve and authorize external training partners (including instructors).
- ✓ Deploy and manage relevant training from any internal or external source from a single marketplace.
- ✓ Issue workers eCertificates that are shareable with employers/regulators through their SkillsPass passport.
- ✓ Enable the secure sharing of valid credentials- across employers and even jurisdictions- with full respect of the worker's right to consent.
- ✓ Empower employers business accounts to access and manage certifications.
- ✓ Provide reporting dashboards to access records and gain actionable insights.

End-to-End Training Delivery & Credential Management

SkillsPass helps power a holistic and transformational workforce upskilling solution. The platform provides true Integrated Skills Management (ISM) across industries and jurisdictions. With SkillsPass, providers can deliver, validate, and track all training formats digitally, and tackle training challenges that would overwhelm a traditional LMS.
