

Innovative Transportation Training Solutions

Advancing industry-wide skill development and empowering the workforce with modern, accessible, and impactful learning experiences.

Background

Bluedrop ISM is a technology innovator that transforms training delivery and credential management through its custom eLearning solutions and SkillsPass workforce training platform.

We collaborate with provincial governments, industry associations, sector councils, and other key transportation stakeholders to design, develop, and deliver critical, industry-wide safety training through tailored online and interactive solutions.

Our Transportation Experience

Our transportation training portfolio includes a range of specialized programs, such as the Class 1 online MELT program in Saskatchewan, the air brakes refresher course in Ontario, and a micro-credential program for dispatchers in Nova Scotia. Additionally, we developed nationwide online training for delivery, rideshare, and Class 1/A commercial drivers, all developed in collaboration with the Canada Safety Council.

We've also recently embarked on a new partnership with Alberta's Transportation Ministry, where we are co-developing a self-paced, online entry component for the upcoming Class 1 Driver Learning Pathway, which will launch in 2025.

Comprehensive Training Solutions

We get that every project and customer requirement is unique, and we're fully equipped to meet them! Our in-house eLearning experts craft highly customizable content, while our versatile platform offers the utmost training delivery flexibility.

- Ground-up course creation or content translation from an existing source.
- Secure SkillsPass platform hosts training, links stakeholders, and manages credentials.
- Customized to meet unique industry, regulatory, and regional requirements.
- Complete with a promotional webpage and optional support to maximize engagement and results.

This new online and interactive version of the MELT classroom training offers more flexibility and higher training standards for commercial truck drivers."

Karol Noe
Senior Director

Why Choose Bluedrop?

Our solutions are backed by long-standing partnerships with industry leaders and subject matter experts. This provides us with valuable insights into sector-specific training challenges that we apply to each successive project.

- Experienced**
We've created **hundreds** of hours of custom eLearning for partners in sectors ranging from healthcare to transportation.
- Industry-Scale**
These solutions have been deployed via our SkillsPass platform for use by **thousands** of dispersed workers and job seekers.
- Proven Outcomes**
Our partners have generated **millions** of efficient training outcomes and secure digital certificates for workers around the globe.

Let's Get to Work!

Regulators and oversight agencies trust our transportation training solutions to engage employers across industries, and efficiently reach hundreds to millions of workers.

Whether you're looking to optimize an existing training program or create something new, we can help. Contact us to get started.
