

Work Safe Training: COVID-19

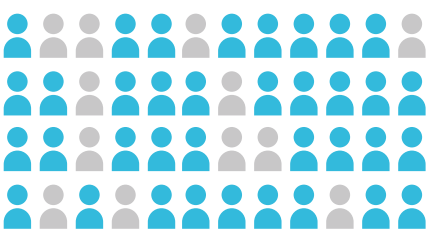

What Employees Have to Say

The COVID-19 Work Place Safety Course provides simple, practical instruction on how to reduce the risk of catching or spreading COVID-19 in the workplace. It is offered within the SkillsPass™ platform, a cloud-based, enterprise-scale employee training, certification, and compliance management solution currently operating in many jurisdictions worldwide.

Recent research conducted with over 200 Newfoundland & Labrador employees who undertook the COVID-19 Work Safe Training Course provided insights into the power and potential of the platform and course content in advancing the knowledge of a broad spectrum of workers.

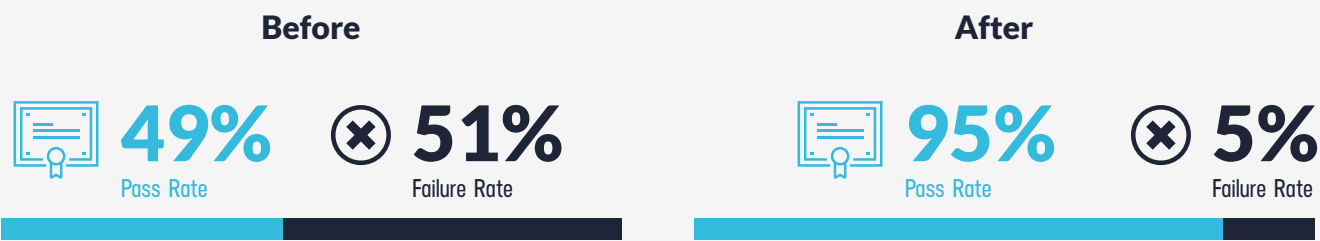

With 75% of respondents indicating that they had little to no workplace training for COVID-19 safety in the workplace, it's clear that more needs to be done to protect the worker, the customer, and the employer's safety obligation and overall reputation.

75%

Clear knowledge gaps in COVID-19 work place safety

Based on the respondents' pre and post-training test results

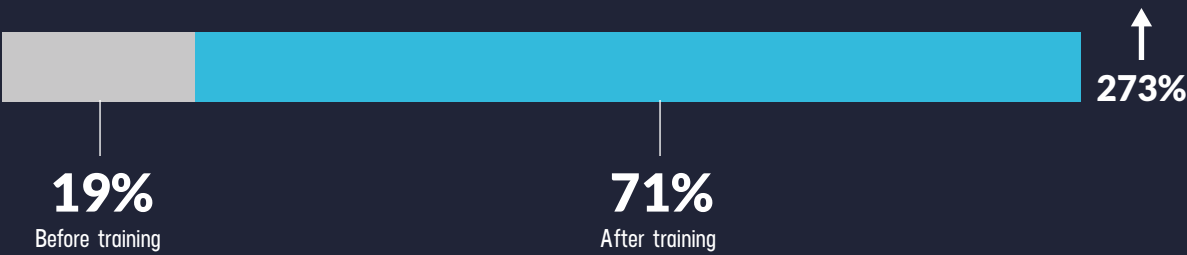

Exceptional Post-Training Knowledge Increases

Overall knowledge went up by 53% after the training, including exponential increases in five key areas.

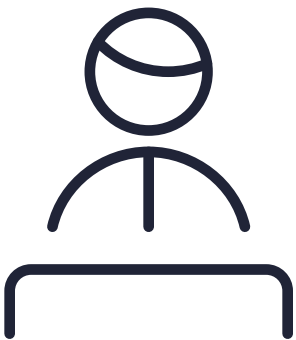

Practical knowledge, powerful results

Understanding how long the COVID-19 virus survives on common workplace surface types (aggregate scores)
