

Modern Healthcare Training Solutions

Delivering scalable, technology-enabled training solutions that strengthen clinical readiness and workforce performance in healthcare.

Background

By combining our deep domain experience in workforce training with the expertise of our in-house healthcare experts, we deliver cutting-edge learning solutions that align with real-world healthcare and compliance challenges.

We collaborate with provincial governments, healthcare institutions, regulatory bodies, and professional associations to design, develop, and deliver critical, industry-wide healthcare training through tailored online and interactive solutions.

Our Healthcare Experience

Backed by internal experts with over 100 years of combined clinical experience—and accredited expertise in healthcare education, training, and simulation—our custom solutions reflect real-world clinical and compliance needs.

AccelerateIEN is one of several innovative solutions designed to fast-track entry and success in healthcare. This multi-layered program uses simulation-based tools and support to optimize clinical readiness for internationally educated nurses (IENs).

Other Solutions:

Remote Trauma Training (RTT) – A blended learning program that enhances emergency response capabilities for healthcare professionals in remote and rural regions through scenario-based simulation and interactive modules.

COVID-19 WorkSafe Training – Rapidly-deployed online training that delivered essential infection-prevention and education to businesses and thousands of Canadian workers.

Simulation continues to redefine nursing education, and emerging virtual platforms allow us to reach learners in rural, remote, and distributed settings where hands-on opportunities are limited.

Tailored Training Solutions

We know healthcare isn't one-size-fits-all. That's why our team builds customized learning experiences that align with clinical standards, workforce priorities, and regulatory needs. Our in-house simulation and eLearning experts craft highly customizable content, while our versatile platform offers the utmost training delivery flexibility.

Ground-up training creation or content modernization from an existing source.

Secure SkillsPass platform hosting to link stakeholders and manage credentials.

Fully customized to meet unique industry, regulatory, and regional requirements.

Complete with a promotional webpage and optional support to maximize results.

Why Choose Bluedrop?

Backed by decades of experience, our specialized training solutions drive scalable, efficient learning that prepares healthcare professionals to deliver confident, patient-centered care and support.

Experienced

We've created **hundreds** of hours of custom eLearning for partners in sectors ranging from healthcare to transportation.

Industry-Scale

These solutions have been deployed via our SkillsPass platform for use by **thousands** of dispersed workers and job seekers.

Proven Outcomes

Our partners have generated **millions** of efficient training outcomes and secure digital certificates for workers around the globe.

Let's Get to Work!

Trusted by governments and regulators, our specialized training solutions power workforce readiness across industries.

Whether you're looking to modernize an existing training program, accelerate clinician or support staff onboarding, manage micro-credentials for emerging roles, or create an entirely new workforce readiness pathway, we can help.
