

Strengthening RN readiness, confidence & retention in Canadian healthcare

AccelerateRN™ is a six-month, simulation-based nurse residency program that integrates with active clinical deployment to support nurses during the most vulnerable transition period—without extending orientation or reducing productivity.

What's in the Program?

1. Structured Residency & Simulation
A protected, simulation-dominant residency week designed to build foundational clinical judgment, prioritization, and professional confidence in high-risk transition scenarios.

3. Embedding into Practice
Wraps around existing orientation practices, aligning with unit workflows and timelines. Continues structured support as nurses assume full patient workloads and independent practice.

2. Ongoing Integration & Mentorship
Biweekly and monthly simulation sessions with structured debriefing and coaching. Longitudinal mentorship to support real-world clinical decision-making and professional growth.

Key Resources & Features
Access to 100+ eLearning courses, VR simulation library, regular check-ins with Nurse Educators (IENs & Preceptors), and a Concierge Service with 1-on-1 assistance.

Why It Matters

-  **Accelerating Safe Practice**
Simulation, coached clinical reasoning, and real-case reflection strengthen clinical judgment, prioritization, communication, and escalation earlier in practice.
-  **Supporting Workforce Retention**
Longitudinal support reduces reality shock, builds confidence, and fosters belonging—improving six- and twelve-month retention outcomes.
-  **Protecting Productivity**
Integration with existing orientation means nurses are supported without extending timelines or reducing clinical assignments.

Who It's For

AccelerateRN supports:

- New graduate RNs transitioning to independent practice
- Nurses returning after career breaks or leave
- RNs new to a clinical setting needing structured support

Key Benefits

-  Builds confidence and clinical readiness
-  Strengthens safe independent practice
-  Reduces transition risk without extending orientation
-  Supports workforce stability and retention
